DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The prior art does not teach a method for processing a rotor forging comprising casting an ingot having first and second ingot regions having varying alloys and having an intermixed transition region therebetween and forging the ingot to produce a rotor forging having first and second rotor forging regions having varying alloys and having an intermixed transition region therebetween and ascertaining boundary points of the transition zone using surface chemical or ultrasonic methods to define two-dimensional cross-sectional shapes and then using the shapes to produce a three-dimensional approximation of the transition zone of the rotor forging.

2. Rejection based on 112 (2nd) is withdrawn as it has become clear that the three-dimensional contour obtained from the sectioned rotor forging specimen is used to predict the three-dimensional approximation of the rotor forging 10 which is machined into a rotor.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inventorship

4. In view of the papers filed September 14, 2005, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by addition of:

Francis Alexander Reed

Robert V. Falsetti

5. The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.
